CATTLE FEEDLOT CONCENTRATE PREMIX

A feedlot concentrate for lot feeding beef cattle for prime beef production. A concentrate that will ensure cattle maximize their feed conversion and hit mortal weight rapidly. Cattle Feedlot Concentrate contains Rumensin and Tylan, for improved feed efficiency.

Mixing Instructions:

Mix at the rate of 1 part concentrate to 25 parts grain (4% inclusion rate), ideally mainly barley.

Feeding Instructions:

Feed from 2.5 – 3.5% of bodyweight of concentrate feed for fattening. Roughage content of the diet should range from 7% to 20% of total ration. Contains enough protein, so that straight grain, provides a complete balance, with just the single extra additions of 2% Bentonite and 5-7% hay/straw (if possible). If a roughage cannot be blended with the grain, free choice hay/straw should be made available.

Ingredients:

Stock lime, Urea, Lupins 30%, Salt, Dicalcium Phosphate, Beef Premix, Feed Tallow Blend, Powdered Sulphur, Rumensin 10% Premix, Tylan 50 .

WARNING - CONTAINS UREA

Directions for use:

Keep dry as when wet, urea could become soluble and lead to urea toxicity. Introduce slowly and always ensure adequate "gut-fill" of forage before introducing feed supplements (this premix at a lower inclusion rate for one week before going to recommended mix). Forage should be provided with the ration or offered ad-lib.

Precautions:

Feeding this product to horses or other equines may be fatal.

This product **does not** contain Restricted Animal Material.

Analyses.

M.E. – Ruminants	2.94 MJ/kg	U.D. Protein – Ruminants	1.92 %
Fat	2.67 %	Calcium	11.75 %
Fibre	3.10 %	Phosphorus	1.65 %
